

ANNOUNCEMENT

Version Release

The Formtek File Linking Extension is now available for Alfresco 5.

The Formtek File Linking Extension allows a single document to be accessible from multiple locations without physically duplicating the document. A user who is able to edit the primary document is able to create a reference in any number of locations that links back to the physical document. Any changes made to the physical document or its metadata are immediately accessible from all referenced locations.

Current customers of the Formtek File Linking Extension may download the software and documentation from their account at [Formtek Support](#).

The Formtek File Linking Extension is one of several Formtek Extensions designed to increase the capabilities and productivity of your Alfresco implementation.
