Formtek EDM Module and EDM Connector v3.3 released!

New features, and available for Alfresco 6.1.x, 6.0.x, and 5.2.x on Windows or Linux

The Formtek *Engineering Data Management (EDM) Solution* manages engineering information, including CAD files, within Alfresco. The Formtek EDM Module extracts and maps AutoCAD attributes to Alfresco properties, renders AutoCAD and MicroStation drawings for viewing in Alfresco, manages XRef associativity, and much more. The Formtek EDM Connector for AutoCAD allows users to interact with the Alfresco repository from within the AutoCAD application.

New features of the EDM Connector v3.3 include:

- Support for Single Sign-On using Kerberos or SAML (some restrictions apply)
- Configurable prompt to upload modified drawing on close
- New Export as Zip File button to export a repository base drawing and its references as a Zip file to a local folder
- Automatic disabling of properties configured for embedding in the Formtek EDM Module. (You no longer need to disable property editing when embedding is configured.)
- Support for the yyyy/MM/dd date format for property editing and searching

New features of the EDM Module v3.3 include:

- A new Export as Zip File action that exports a base drawing and its configured references to a local Zip file
- New global properties in support of new features in the 3.3 release of Formtek EDM Connector for AutoCAD:
  - edm.connector.global.sso – Use Single Sign-On to connect to the Alfresco repository from the EDM Connector
  - edm.connector.global.upload_on_close – Prompt the user to upload the modified drawing before it is closed in AutoCAD
- Updated CADConverter and CADExtractor executables
