

ANNOUNCEMENT

Formtek receives Subcontract extension for Alfresco services from Berkeley National Laboratory

September 21, 2021

Walnut Creek, California USA — [Formtek, Inc.](#) has received a Subcontract extension for professional services from The Regents of the University of California (the University).

The Subcontract was issued under the University's Prime Contract with the US Department of Energy for the management and operation of the Lawrence Berkeley National Laboratory, commonly referred to as Berkeley Lab. Formtek provides the University with services in support of Berkeley Lab's implementation of the Alfresco Digital Business Platform, with a focus on the implementation of Alfresco Governance/ Records Management.

The initial Subcontract to Formtek was issued by the University in September 2016, with a period of performance of thirty-six (36) months, through August 2019. Two modifications to the Subcontract had previously been issued, extending the period of performance through August 2021. This latest Subcontract is Modification No. 3 and continues the provision of professional services to Berkeley Lab through August of 2022.

Formtek professional services to Berkeley Lab include technical architecture and design, business process analysis, software configuration, software development, quality assurance testing, project management, training, and operations support. Formtek's most recent activity at Berkeley Lab is the creation of an action within Alfresco's Governance Services module that archives the Lab's Strategic Partnerships Office (SPO) documents associated with partnership proposals and awards. The custom action processes a queue of in-coming SPO documents that originate from the Lab's Electronic System for Research Administration (eSRA) system. It imports them into the Alfresco Records Management FilePlan and declares them as records, maps eSRA attributes to Alfresco metadata properties, and assigns life-cycle disposition instructions with a retention schedule. The custom SPO Import action can be run either on-demand or as a scheduled job.

[Berkeley Lab](#) is a multiprogram national laboratory, managed by the University of California for the U.S. Department of Energy's Office of Science.

About Formtek: For over two decades, Formtek has been providing mission-critical IT software and services to some of the most demanding engineering, manufacturing, aerospace, industrial, and technical organizations in the world. We build products and solutions for content management platforms that are open and adaptable to complex IT environments, including Formtek | Orion Content Repository Services and the Alfresco Digital Business Platform. Our software application solutions also include the Formtek Engineering Data Management (EDM) Solution for Alfresco. To learn more, visit www.formtek.com.
